Executive Summary

Aspiring DevOps / Cloud Engineer and final-year B.E. student with hands-on experience deploying full-stack applications on AWS EC2 using Docker containers and Jenkins CI/CD pipelines. Skilled in AWS (EC2, S3, IAM), version control with Git/GitHub, and full-stack web development with React.js and Express.js. The role calls for building reliable, automated deployment workflows and managing cloud infrastructure — areas I have applied across an internship and live, production-deployed projects. I am confident I am a strong fit and eager to contribute to scalable, automated systems from day one.

Technical Skills

Cloud (AWS): EC2, S3, IAM, Security Groups, Elastic IP

DevOps Tools: Jenkins (CI/CD Pipelines), Docker, Git, GitHub, Linux, Nginx

Programming: Java, JavaScript, C

Web Technologies: React.js, Express.js, Node.js, HTML, CSS

Professional Experience

KnackForge Soft Solutions Private Limited

Aug 2025 – Sep 2025

Role: AWS Cloud Intern (Hybrid), Chennai, India

- Launched and configured AWS EC2 instances, managed access policies with IAM, and handled application assets in S3 buckets.
- Deployed and maintained a real-time chat application (React.js, Node.js, Socket.io) on cloud infrastructure, configuring security groups and monitoring instance health.
- Collaborated using Git/GitHub workflows — branching, pull requests, and code reviews — following CI/CD practices for automated, repeatable deployments.

Projects

CareConnect — On-Demand Care Platform

2026

Tech: Docker, Jenkins, AWS EC2, React.js (Vite), Express.js

- Built and deployed a care-services web platform; containerized the React.js frontend and Express.js backend with Docker for consistent environments across development and production.
- Provisioned and configured an AWS EC2 instance (security groups, IAM roles, Elastic IP) and hosted the live application on a custom domain.
- Automated build and deployment with a Jenkins CI/CD pipeline triggered by GitHub pushes — building Docker images and redeploying containers with zero manual steps.

FUNNOVA — Digital Learning Platform

2026

Tech: Docker, Jenkins, AWS EC2, AWS RDS (PostgreSQL), React.js (Vite), Node.js, Express.js

- Built a child-friendly digital learning platform for Grade 4-5 Mathematics and Science with role-based JWT authentication, interactive quizzes, and live progress tracking (React + Vite frontend, Node.js/Express backend).
- Containerized the frontend and backend services with Docker for consistent, reproducible environments across development and production.
- Deployed the application on an AWS EC2 instance connected to a managed AWS RDS (PostgreSQL) database for persistent, scalable data storage.
- Automated the build and release process with a Jenkins CI/CD pipeline triggered by GitHub pushes — building Docker images and redeploying containers with zero manual steps.

Education

KCG College of Technology

2022 – 2026

B.E. Electronics and Communication Engineering — CGPA: 8.45, Chennai, India

Certifications & Accomplishments

- Fundamentals of Java Programming — Coursera
- Introduction to IoT — NPTEL
